

Miss Alex's Guide to STEAM at Home

Easy crafts for kids that are bored at home!

How To: Make-Your-Own Cold Snow

Supplies:

- (Frozen) baking soda
- 1-2 cups of cold water (added slowly)
- A large bowl or container
- Trays, cookie cutters, vinegar, etc. (for playing!)

Directions:

1. Freeze your baking soda. This step is not necessary, but it makes the snow feel more real!
2. Pour 4 cups of frozen baking soda into a bowl.
3. SLOWLY add cold water into the bowl while mixing, just adding a little at a time until the desired consistency is reached.
4. Kids will have a great time molding it, but use cookie cutters to make it more fun or put it on a tray so that they can practice writing in it!
5. Adding squirts of vinegar will cause a chemical reaction, making the snow fizz up!
